Summary

- Computer Science graduate passionate about building practical, user-focused web applications. Experienced in MERN stack development with strong skills in frontend and backend technologies, RESTful APIs, and database-driven applications.

Experience

- **Soften Technologies**
Mern Stack Developer
Developed and maintained full-stack MERN applications, building responsive React interfaces, integrating RESTful APIs with Node.js and Express.js, and managing MongoDB databases.

Education

- **Sree Narayana Gurukulam College of Engineering** 2025
BTech in Computer Science and Engineering
6.58
- **St John's Syrian Higher Secondary School** 2021
Plus Two(XII)
91%
- **Little Flower High school** 2019
SSLC(X)
98%

Skills

- Frontend: HTML, CSS, JavaScript, React.js
- Backend: Node.js, Express.js
- Database: MongoDB
- Languages: JavaScript, Python
- Tools: Git, GitHub, VS Code,

Projects

- **Major Project: Smart Home:Unified Environmental safety system**
The aim of the project is to develop an IoT-based system for air pollution detection with real-time alerts via a mobile app using reactnative and node.js.
- **ShopEase E-Commerce System**
The aim of the project is to develop a user-friendly e-commerce web application that allows users to browse products, manage cart and wishlist, and enables admin to efficiently handle product and user management.
- **Online Complaint Mangement System**
A web-based application developed using the MERN stack that allows users to register complaints, track their status, and enables administrators to manage, assign, and resolve complaints efficiently using role-based access control.
